ValueSaver / ChangeSaver High Friction Composition Brake Shoes

High quality, innovative Anchor Brake Shoes include the **ValueSaver** and the **ChangeSaver** – AAR M-926 certified 1.5" and 2" thick high friction composition freight car shoes proven to perform well in today's heavy haul environment.

Key Features

- **High strength low alloy steel backing plate** prevents premature brake shoe removals attributed to broken brake shoes caused by excessive vibrations.
- **Unique PadLock™ dampening pad technology** reduces friction material delaminations by adding strength to the bond between the briquette and the backing plate.
- **Full-width friction face** provides even distribution of brake shoe forces across the wheel tread.
- **ValueSaver** brake shoes deliver better performance and additional benefits for the same price as your good old shoes.

Highest quality, superior service, competitive prices

Anchor Brake Shoe Company, a fully accredited ISO 9001 and AAR M-1003 facility with vast expertise in railroad friction products, offers brake shoes that are Engineered to Outperform (E₂O), providing outstanding braking performance. Your experience with Anchor will always be positive because we're dedicated to superior customer service. Call our knowledgeable staff at **630 293-1110** to help you select the right brake shoe for your application, and you'll understand just what we mean.
