WheelSaver High Friction Tread Conditioning Brake Shoes

Innovative Engineered to Outperform (E₂O) Anchor Brake Shoe products include **WheelSaver** – a high friction, tread conditioning BEST brake shoe for freight car applications, available in 1.5" and 2" thicknesses. Our friction material is AAR approved for interchange use and is certified to the AAR-997 High Friction Tread Conditioning, High Capacity Brake Shoe standard.

Key Features

- **A stable coefficient of friction** provides reliable and consistent braking in all weather conditions regardless of the amount of work or heat being put into the shoe.
- **100% shoe face tread conditioning capabilities** allow the wheel tread to be conditioned even in applications of sagging brake rigging.
- **Semi-metallic friction material** extends wheel service life by maintaining kip levels and repairing minor wheel tread defects such as shelling and spalling.
- **Longer brake shoe life** – typically lasts 4 to 8 times longer than composition shoes, and outperforms the other tread conditioning shoe almost 4 to 1

Highest quality, superior service, competitive prices

Anchor Brake Shoe Company, a fully accredited ISO 9001 and AAR M-1003 facility with vast expertise in railroad friction products, offers brake shoes that are Engineered to Outperform (E₂O), providing outstanding braking performance. Your experience with Anchor will always be positive because we're dedicated to superior customer service. Call our knowledgeable staff at **630 293-1110** to help you select the right brake shoe for your application, and you'll understand just what we mean.
