ChangeSaver High Friction Composition Brake Shoes

High quality, innovative Anchor Brake Shoes include the **ChangeSaver** – the most durable, longest lasting AAR M-926 certified high friction composition freight car shoe for today's heavy haul environment.

Key Features

- **High strength low alloy steel 3-3/8" wide backing plate** reduces broken brake failures due to excessive vibrations and extends brake shoe life cycle up to 217.5% as long as competitors' brake shoes.
- **Unique PadLock™ dampening pad technology** reduces friction material delaminations by adding strength to the bond between the briquette and the backing plate.
- **Full-width friction brake shoe design** provides 45% more friction material by weight than any other AAR-approved product.
- **Additional friction material** delivers roughly 71% more braking miles than competitors' brake shoes based on dynamometer testing.

Highest quality, superior service, competitive prices

Anchor Brake Shoe Company, a fully accredited ISO 9001 and AAR M-1003 facility with vast expertise in friction products for rail applications, offers two AAR-certified brake shoes that are Engineered to Outperform (E₂O). Both **ChangeSaver** and **ValueSaver** brake shoes provide outstanding braking performance. Your experience with Anchor will always be positive because we're dedicated to superior customer service. Call our knowledgeable staff at **630 293-1110** to help you select the right brake shoe for your application, and you'll understand just what we mean.
